

PRIORITY CHARTER SCHOOLS KILLEEN — CADETS —

Priority Charter Schools – Killeen is a free, open-enrollment charter school serving students in Kindergarten – 4th grade. At PCS – Killeen, we make it our priority to provide a robust academic environment with a personalized learning approach in a small-school setting.

HMH Ed™ is a comprehensive online teaching system that seamlessly blends technology, content, and instruction to personalize learning. HMH Into Reading, the core English/Spanish literacy program, is meticulously designed to ensure confident reading and writing skills, with built-in support for multilingual learners. The system's assessment data guides teachers in differentiating instruction, while a vast library of award-winning texts, available in print and digital formats, supports whole-class shared reading.

Eureka Math is designed like a story, focusing intensely on key concepts that build enduring knowledge over time. Students gain a comprehensive understanding of math, using consistent models and problem-solving methods throughout grades. The curriculum emphasizes fewer topics, allowing students to understand the "why" behind math, not just the "how." Eureka Math maintains rigor, combining conceptual understanding with procedural skills and real-life applications.

PhD Science encourages students to think and act like real scientists, fostering deep comprehension through hands-on activities and evidence-based learning. Students actively engage in scientific inquiry, asking questions, gathering evidence, and constructing explanations. Teachers facilitate learning, but students take ownership, applying their understanding to new contexts. Lessons build on each other, helping students develop a strong understanding of science concepts.
